Skills

- HTML / CSS
- BOOTSTRAP 4
- REACTSTRAP
- REACT-BOOSTRAP
- SASS
- JAVASCRIPT
- REACT.JS
- NEXT.JS
- TYPESCRIPT
- REDUX
- REACT REDUX
- REACT REDUX FORM
- NODE.JS
- EXPRESS.JS
- MongoDB
- MySQL

Education

Bachelor of Science: **Software Engineering (2015 - 2020)**
University of Lahore, Lahore

Intermediate of Computer Sciences (ICS) (2013 - 2015)
Punjab Group of College, Lahore

Matric in **Computer Sciences**
Cathedral Higher Secondary School, Lahore

Experience

React-JS Frontend Developer

DevBunch

Oct 2021 – Jan 2022 (4 Months)

- Complete Single Page Application (React JS, React Redux, Json-Server)
- Complete Single Page Application (Next JS, Next JS API's, React Redux, MongoDB)
- Complete Template with Applied Filters on Dynamic Data.
- Admin Dashboard in React JS and Implement User Management CRUD using Laravel API's.
- JavaScript Debugging.

Final Year Project

Ad at Hand with Beacon Technology is a Mobile Application in which system will allow users to know promotions offered in its surrounding areas. A Bluetooth Beacon is a hardware transmitter device that broadcasts its signals to nearby smartphones to perform actions when near a beacon. It can be used to determine the physical location of business entity, or used to trigger a location-based action on a device such as popup notification. The application is used to distribute messages at a specific range, for example: nearby a shopping store, or a restaurant etc. Bluetooth beacon sends packets of information that contains a Universally Unique Identifier (UUID). This UUID is used to trigger events specific to that beacon which means we can send different customized push notifications based on different beacons. Once a UUID is sent to the server the appropriate message action is sent to a user device.

Licenses & Certifications

- Front-End Web UI Frameworks and Tools Bootstrap 4 – Coursera
- Introduction to JavaScript the Basics – Coursera
- JavaScript Essentials for Beginners – Coursera
- Modern JavaScript ES6 Basics – Coursera
- Front-End Web Development with React – Coursera
- Server-side Development with NodeJS, Express and MongoDB – Coursera

Interest

- Learning Something New
- Coding
- GYM
